We can now offer three ranges of heat sealer solutions from light use sealers to heavy duty industrial sealing machines. Our years of experience in the packaging industry have enabled us to provide advice to our customers on the best heat sealing options available for their applications.

Heat Sealer Range

Cost effective Heat sealer Solutions

Impulse Heat Sealers with and without cutter Seals up to 2 x 150mu (600g)

Pacseal Impulse Heat Sealers are available in 5 widths from 200mm to 500mm either with or without cutters. Spare parts kits are also available that include replacement elements, blades and teflons.

Ask about our Film Unrollers

Automatic Magnetic Impulse Heat Sealers

Automatic Heat Sealer for continuous sealing of polybags with electronic timer and magnet. Sealing head designed to eliminate operator error, as the sealing head is held down by the electromagnet until the film has had sufficient time to seal and cool. The AMI 450 produces a heavy duty seal. Includes an electric foot pedal for manual operation. Seals up to 2 x 150mu (600g)

This is only a small selection of machines available. Ask for more information about:

• Stainless steel versions

• Sealers for liquid materials, powders, thick foils, laminated materials and code/seal date stamping
